

## **Request for Expressions of Interest**

### **E15-253 Certified Steel Fabrication/Welding Services**

Emera Newfoundland & Labrador (ENL) is building and will own a 500 MW +/- 200kV HVDC transmission project between the island of Newfoundland and Nova Scotia, including two 170 kilometre subsea cables and approximately 300 kilometres of overhead line on the island of Newfoundland and less than 50 kilometres of overhead line in Cape Breton.

ENL is currently seeking Expressions of Interests (EOI) from companies with interest in providing Certified Steel Fabrication/Welding Services in Newfoundland & Labrador and Nova Scotia.

The intent of this activity is to identify companies interested in participating in this procurement process. Companies interested in participating in this procurement process are required to complete and submit the EOI questionnaire to ENL by 3 pm NST on Friday, December 11, 2015. To access the EOI questionnaire please visit: [www.EmeraNL.com](http://www.EmeraNL.com) or email a request to: [ENLprocurement@emera.com](mailto:ENLprocurement@emera.com).

ENL is committed to meeting our obligations under the interprovincial industrial benefits agreement between the governments of NL and NS and to ensuring Gender Equity & Diversity opportunities are optimized.
